EXPERIENCE

Software Engineer II | CDG Group

Apr 2025 - Present

- Architected and led development of a full-stack enterprise timesheet application using **React**, **TypeScript**, **Express.js**, **Azure Functions**, and **Yardi APIs**, replacing manual Excel and paper-based workflows with automated role-based approvals, improving operational efficiency and data accuracy by **58%**
- Reduced **Azure** cloud infrastructure costs by **45%** by redesigning backend API request patterns, eliminating redundant **Azure Function** invocations, and optimizing service configurations for improved performance and scalability
- Modernized legacy **Microsoft Dynamics NAV ERP** integrations by resolving **Azure** deployment issues, restoring CI/CD workflows, and migrating services from **SOAP** to **REST APIs** to support **Business Central**

Full Stack Developer | Arima

Feb 2022 - Sept 2024

- Developed and deployed 50+ features end-to-end, providing dynamic user experiences and optimizing Arima's data science marketing tool for scalability using **React**, **Flask**, **Redis**, **GCP Functions**, **AWS EC2**, and **Azure**
- Reduced load on primary database, achieving a **41%** reduction in query latency while also enhancing overall application performance by minimizing redundant Datastore access
- Engineered a data-driven application that empowers clients to autonomously craft sophisticated marketing mix models, resulting in a significant **27%** increase in customer engagement

DevOps Engineer Co-op | OpenText (MicroFocus)

May 2021 - Aug 2021

- Implemented **Sonarqube** quality assurance tool in CI/CD **Jenkins** build pipelines enabling company-wide repository code coverage metrics and reports
- Created **Python** tools to access APIs from web-based application lifecycle management platforms to update release managers using cron jobs for daily monitoring

UX Developer Co-op | OpenText (MicroFocus)

Sep 2020 - Dec 2020

- Built and integrated high-value functionality and front-end features, enhancing product UI performance and user experience using **React**, **ES6**, and **JSX**

Quality Engineer Co-op | OpenText (MicroFocus)

Jan 2020 - Apr 2020

- Produced an automation system for the development life cycle using **Java**, leveraging the **Apache Hadoop** architecture for integration processes

Projects

AI Document Assistant (WIP)

Python, FastAPI, React, OpenAI API, LangChain, ChromaDB, Docker

- Developing a Retrieval-Augmented Generation (RAG) application that enables users to query enterprise PDF documents using natural language
- Building a **FastAPI** backend to ingest PDF documents, generate vector embeddings, perform semantic search, and integrate with **OpenAI API**
- Creating a **React** frontend for document uploads, conversational chat, and cited responses grounded in uploaded enterprise documents

EDUCATION

University of Ottawa, BAsC in Computer Engineering Co-op, Dean's Honour List

Sep 2017 - Dec 2021

SKILLS

- **Programming:** Python | JavaScript | TypeScript | HTML | CSS | SQL | Java
- **Technologies:** React | GCP (BigQuery, Datastore) | AWS (EC2, CloudWatch, S3) | Azure Cloud | NextJS | MongoDB | Git | Flask | Redux | Jenkins | Docker | Kubernetes | Firebase | Microsoft SQL Server | Microsoft Dynamics NAV | Business Central
